

PRODUCT NAME

The A-SPE NoRust - Mastic is manufactured on the basis of deeply refined mineral oil, hydrocarbons thickener with corrosion and rust inhibitors and adhesion-improving components. It does not contain substances hazardous to human health and to the environment. It does not dissolve in water.

FEATURES & ADVANTAGES

- Easy to apply.
- It contains corrosion inhibitors and adhesion improving components.
- It does not contain substances harmful to human health and to the environment.

APPLICATION

- Clean the surface thoroughly from contaminants, dust, rust and moisture.
- Apply with trowel on cleaned surface.

PACKING

Mastic is packed in PE foil (NoRust-Mastic-2) and plastic cans (NoRust-Mastic-5), protecting the product against mechanical and environmental damages.

TRANSPORT

NoRust-Mastic-2 is transported in a collective package consisting of 6 individual packings. The containers are additionally covered with a moisture resistant protective foil.

NoRust-Mastic-5 is packed separately in plastic cans.

STORAGE

The product can be stored for an indefinite period of time at approximately 20°C and 50% +/- 5% relative humidity.

Density at 20°C:	1,2 ± 1,4 kg/dm ³	
Operating temperature:	-34°C to +55°C	
Flash-point:	200°C	
Colour:	Beige	
Net weight:	NoRust-Mastic-2	2 kg
	NoRust-Mastic-5	5 kg
