

AS 23

BARRIER TAPE

These non-adhesive polyethylene barrier tapes act as a barricade to prevent accidental entry into any prohibited area, thereby promoting overall safety.

BARRIER TAPE

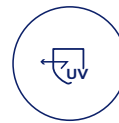

GENERAL DESCRIPTION

Barrier tapes are made of durable, resilient and tear-resistant plastic, which makes them suitable for indoor and outdoor use. This non-adhesive polyethylene barrier tape acts as a barricade to prevent accidental entry into any prohibited area, thereby promoting overall safety.

Quick and easy application as well as economic aspects make barrier tapes popular in many fields of use. Thanks to the printed high-visibility warning stripes (red-white or yellow-black), the tapes are perfect for fencing off accident zones and indicating hazardous areas. They can be also used to mark off race tracks, sport events or car parks. The tape comes packed in a transparent foil that prevents the roll from unfolding when stored.

High visibility printed stripes.

Feature UV coating and scratch resistant ink

Long roll (250m)

High durability (0,04 mm of thickness)

Indoor & outdoor uses

AVAILABILITY

Product code	Dimension (roll)	Colour	Thickness
AS-23/50RW	50 mm x 250 m	Red-white	0,04 mm
AS-23/50YB	50 mm x 250 m	Yellow-black	0,04 mm
AS-23/75RW	75 mm x 250 m	Red-white	0,04 mm
AS-23/75YB	75 mm x 250 m	Yellow-black	0,04 mm
